

# Puppy Tail

Courtesy of: <https://tikkido.com/>

Materials Needed:

Yarn

Step One:

To make yarn tassels, wrap the yarn around your fingers about ten times. Cut what you have wrapped and use one strand of yarn to tie a knot around the center of the strands.

## Step Two:

Cut a longer piece of yarn a few inches longer than you want your tail to be. Tie your little yarn tassels to that long piece of yarn, slide them so that they are evenly spaced to make your tail nice and full. Don't forget to tie a knot at the end so that your tassels don't slide off.

## Step Three:

Cut a piece of yarn long enough so that you can tie it around your waist. Attach your tail to the waist string. If you want, you can use a headband to make ears too!
